

Gary E. VanDeMortel

366 Hook Road Farmington, New York 14425-7070

315-986-3082

Objective Utilize my technical background and interpersonal skills to enable delivery of outstanding products and services to all clients.

Experience 2002 Kodak Commercial & Government Systems
Development Engineer

- Coordinate and perform installations of Kodak equipment to global customer sites for commercial and government contracts. Includes subcontracting activities, developing timelines, cost estimates, resource allocation to meet program requirements.
- Implement high quality monitor and printer calibration at worldwide customer sites for government contracts that meet program requirements.
- Technical resource for global commercial and government product users.
- Develop and deliver customized training to commercial and government customers worldwide using Kodak products.
- Prepared cost basis of estimates and bill of materials data for two major proposals to the U.S. government. Coordinated efforts with engineering, contracts, finance and manufacturing to generate final technical and cost proposal volumes for Government Markets Segment.

1995–2002 Kodak Commercial & Government Systems
Service and Development Technician

- Special project leadership and development. Supervision, management and customer presentations for these projects.
- Research and experimentation on future processes and technologies for direct contract related projects and customer requirements.
- Provide technical support team with solutions to advanced customer problems with specialized products, equipment and processes.
- Developed and published procedures and guidelines for optimizing the interactions between hybrid systems and traditional processes.
- Participated in worldwide standardization program of user imaging workstations towards objective of overall quality improvement of user imaging workstations.
- Developed procedures and manuals for photographic processes for equipment installation for new customers worldwide.

1991–1995 Kodak Communications and Public Affairs
Photographic Technician

- Generated high quality custom color prints for corporate marketing, imaging business units, corporate communications, engineering and photography staff.
- Responsible for generating high volume, high quality photographic business cards for corporate staff and external customers.
- Provided pristine quality professional film processing to corporate staff and photographers.
- Trained department staff in quality control of high volume printers, photographic film and paper processes.
- Improved the departments overall printing waste factor by implementing quality programs and cross training staff.

April 1991– December 1991 E-Systems, Inc.
Senior Production Technician

- Monitored operation of electromechanical and automated, computer controlled pneumatic equipment used to generate and record technical data in a clean room environment.
- Generated film products used by governmental agencies in a time critical, high volume, and high stress environment.
